Epilepsy Warning

Some people may experience photosensitive epileptic seizures or a loss of consciousness when viewing certain visual stimuli, such as flashing lights or patterns, in everyday life. Such individuals are at risk of experiencing seizures while watching television or playing video games. This can happen even in individuals with no history of related health conditions or signs of epilepsy.

The following symptoms are characteristic of photosensitive seizures: blurred vision, eye or facial twitching, trembling arms or legs, disorientation, confusion or momentary loss of balance. During a photosensitive seizure, a loss of consciousness and convulsions may cause serious accidents, as these symptoms are often accompanied by a fall. If you notice any of the above symptoms, stop playing immediately. It is strongly recommended that parents supervise their children while playing video games, as children and adolescents are often more prone to photosensitive seizures than adults.

If any such symptoms occur, **STOP PLAYING IMMEDIATELY AND SEEK MEDICAL ADVICE.** Parents and guardians should keep children in sight and ask them if they have ever experienced one or more of the above symptoms.

System Requirements

Minimum System Requirements PC

- Windows 7, 8, 10
- 64-bit support, 32-bit operating systems are not supported
- Dual-core Intel Core 2 Duo or Athlon 64 X2 processor with at least 2.4 GHz
- DirectX 11-compatible graphics card (NVIDIA GeForce 4xx or AMD Radeon HD 57xx and better) with at least 1 GB VRAM
- 4 GB RAM
- 3.5 GB hard disk space
- Mouse, keyboard
- DVD-ROM drive
- Internet connection and Steam account

Recommended System Requirements PC

- Windows 7, 8, 10
- 64-bit support, 32-bit operating systems are not supported
- Quad-core Intel Core i7 processor with 3.6 GHz or better
- DirectX 11-compatible graphics card (NVIDIA GeForce GTX 780 or better)
- 6 GB RAM
- 3.5 GB hard disk space
- Mouse, keyboard
- DVD-ROM drive
- Internet connection and Steam account

Installation and Start

NOTE: The product is subject to your acceptance of the terms and conditions of Steam subscriptions ("Steam Subscriber Agreement, SSA"). The product must be activated over the internet by registering a Steam account and accepting the SSA.

Further Requirements and Help

The installation requires a one-time internet connection for the authentication as well as the Steam client (included with the game).

Installation Windows PC

Please ensure your computer is connected to the internet before starting the **CITYCONOMY: Service for your City** installation process. Insert the **CITYCONOMY: Service for your City** disc into your computer's disc drive. During the installation process, a one-time online check will be carried out to verify the disc. An activation file will then download, which will require a product code. You will find the code on the back of this manual.

Insert the disc into your disc drive. After a few seconds, a window will appear on the screen. Follow the instructions for the installation, selecting the folder in which you would like to install the game. If the program does not start automatically, double click My Computer on your Windows desktop. Then double click your disc drive icon, followed by the installation file icon "**setup.exe**".

Starting the Game

Following the successful installation, launch the program by selecting Start/All Programs/Steam/Cityconomy from the Windows Start menu or via the corresponding icon on the Desktop.

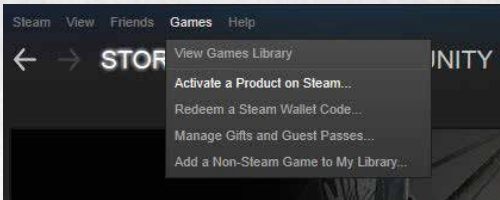

If you encounter security messages when launching the autostart menu on Windows 7, Windows 8 or Windows 10, it is safe to run the "**setup.exe**" program.

Uninstallation

Select **"Start/Settings/Control Panel/Programs and Features"** and select the **"Cityconomy"** entry. Then click the **"Add/Remove..."** button. The program itself, as well as all files and game data, will then be uninstalled.

Registering CITYCONOMY: Service for your City on STEAM®

Thank you for purchasing **CITYCONOMY: Service for your City**. To add the game to your STEAM® library, open the program and log into your account. Creating an account is free of charge. Once you have logged in, the STEAM® homepage will open. Now click on the **"Games"** tab and then on the **"Activate a product on Steam..."** option.

The Product Activation window will open. Here, click "Next" to continue the process.

In the next window, you will have to agree to the STEAM® Subscriber Agreement to continue. In the next window, you will then be able to enter the 12-character STEAM® product code.

You will now be asked to enter your 12-character product code in this window. You will find this product code on the back of this manual.

It looks like this:
XXXXX-XXXXX-XXXXX

Please enter your individual sequence of characters with the hyphens in the designated "Product Code" box.

Then click on "Next" to complete the process.

If the entry is not successful, please try the following solution:

- Check your product code for any input errors
- Zero and/or the letter O can be easily confused

After a successful product activation, you will be able to print a receipt. The game will now be in your STEAM® library and can be installed and launched.

Introduction

Get the complete city economy challenge with **CITYCONOMY: Service for your City!** Time to clean up! Assume the many jobs of a service company and take care of a vibrant metropolis in the open-world city economy simulation CITYCONOMY. For you, that means: From classic garbage collection to drain cleaning, from towing services to lawn mowing, there's a wide range of missions available across the entire city! A total of 15 vehicles await you, even in multiplayer! What are you waiting for? Get behind the wheel of faithfully recreated vehicles from MAN and start the engine. Help to expand your business by successfully completing jobs.

The Main Menu

You can access the game's various submenus via the Main Menu. From the Main Menu, you can create up to five different profiles via "New Profile". After creating your profile, you can choose between Career Mode or participation in a multiplayer match.

Start/Continue Career

If you have created a new profile, you will start a completely new career. In this case, you will first select the garbage disposal department. As the game progresses, you will be able to choose between garbage disposal, car towing, gardening, road services and sewerage services. However, you will first need to unlock each of these departments. Also choose a character name, company name and company logo.

If you have the feeling that you've got too little money to get you through the month and that your staff and vehicles are eating you out of house and home, you can adjust the difficulty setting in the Options menu.

If you have played before, your latest save will be loaded.

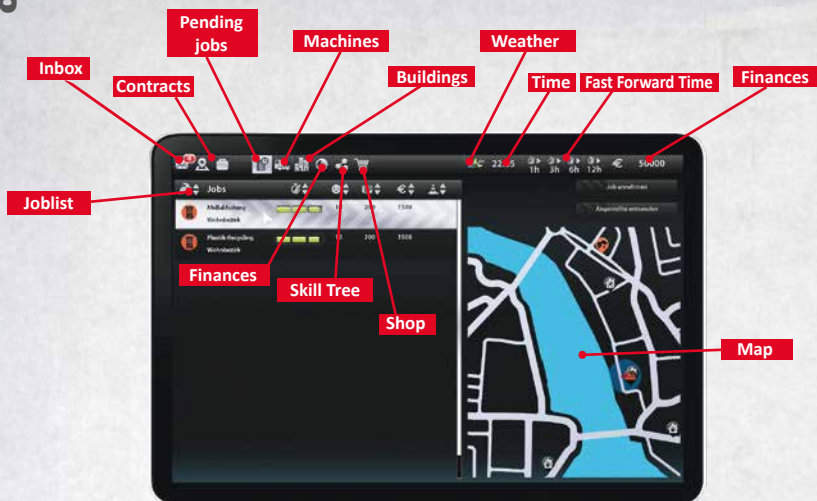

Multiplayer Match

Click on "Multiplayer" if you want to take part in a multiplayer match. First select one of the available games from the list which has empty spaces.

To start your own game, click on "Create Game". Then define whether you want to host a public (visible to all) or a private game (players must enter a password). Also set the number of players and the name of your game. Then click "Create Game" again.

As the host, you are the boss and your teammates are your employees, who complete jobs for you. In this way, you will earn money and experience significantly faster and make quicker progress.

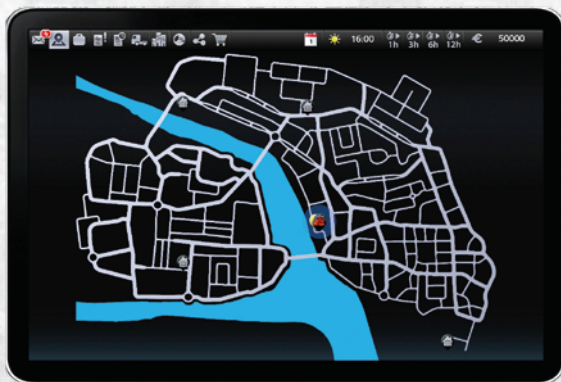

Getting Started in the Game

Inbox

You will receive messages in your inbox containing tips on how to do things in the game and what improvements are available to you. You will receive important messages from the mayor, your employees and your accountant that you should definitely read.

Map

You will see all your jobs, buildings and active vehicles on the map.

Contracts

Earn Citizen Satisfaction points for completing tasks and use them to unlock contracts in new districts.

Job List

View the available tasks and select one or more of them.

Vehicles

You can expand your fleet. Buy a vehicle for an employee or to test your new skills.

Buildings

Go to your Shop menu and browse the list of buildings. Each of them brings your company new resources or opportunities, and opens the doors to big money.

Finances

View your finances to keep a check on your loans, running costs, and revenues and expenditures. Remember that in addition to one-time expenditures for the purchase of vehicles and building, you will also incur other costs, such as for building maintenance and staff.

Skill Tree

All your experience and progress are summarized here again in numbers. You can always see how many Experience Points you need to reach the next level. Your current experience level and the associated benefits are displayed here too. You will also get a taste of what awaits you at higher levels.

Shop

You can buy buildings and vehicles in the Shop.

Calendar

The calendar shows you what day it currently is.

Clock

Here you'll see the time in the game world.

Weather

Here you can see the weather conditions in the city.

Fast-Forward Time

If time is passing too slowly for you, you can speed it up with the Fast-Forward function and jump one, three, six or twelve hours ahead.

Options

Keyboard

Here you can change the controls for your character and your vehicles as you like.

Graphics

Adjust the graphics settings individually to your computer for the best possible gaming experience.

Performance

Adjust the in-game values for shadows, reflections, vegetation quality, etc. so that your version of the game runs smoothly.

Audio

Adjust the volume of the game sounds to your requirements.

Vehicles

In the following section you'll find a summary of all the vehicles in the game.

Garbage Disposal

Paper Recycling Truck

Glass Recycling Truck

Plastic Recycling Truck

Garbage Truck

Towing Service

Tow Truck

Road Services

Tar Tanker Truck

Road Sweeper

Small Tar Tanker Truck

Small Road Sweeper

Sewerage Services

Sewage Truck

Septic Truck

Small Septic Truck

Small Sewage Truck

Gardening Services

Lawn Mower

Small Lawn Mower

You can change the controls for each vehicle and your character at any time under "Options" -> "Keyboard". If you ever don't know what to do with a vehicle in the game, you can simply read the controls tooltips. You can press the "O" key to turn the tooltips on and off for each vehicle and during each action. This will show you how to control each vehicle to perform the respective action in the game.

Here you will find a summary of the most important control commands. The rest of the commands are displayed in detail in the game.

Keyboard Commands - Vehicles

Mouse/keyboard	Function
W	Accelerate
S	Reverse/brake
D	Right
A	Left
Q	Handbrake
H	Horn
L	Lights
P	Warning lights
E	Make the character enter/exit the vehicle
Tab	Jump to the next vehicle
O	Control help on/off
F	Interaction with the vehicle, e.g. lift garbage can
R	Reset vehicle
G, U, J, I, K and arrow keys	Further interactions with the vehicles (depend on vehicle type)

Keyboard Commands - Character

W	Forward
S	Backward
D	Right
A	Left
Shift	Run/walk
O	Control help on/off
Spacebar	Jump

Resetting vehicles

You can't make an omelet without breaking eggs, and sometimes things also go wrong when running a city. Even in our world, you can get stuck somewhere, a collision with a vehicle is more intense than expected and you land somewhere it's best not to stick around. In this case, you can return your vehicles to the last safe position using the Reset function (R key on your keyboard).

A glance at the minimap helps

Pay regular attention to the minimap that is constantly displayed in the game as this shows all the important place and gives hints on where you should go next. If you have selected a mission, an indicator on the minimap will show you the direction.

Look out for quest givers

You will find quest givers throughout the city that you can talk to. They have a range of different tasks for you – but you can't manage them all from the very beginning. Concentrate on the tasks you have the right vehicles for. As you gradually expand your fleet, you can return to the quest givers and also accept other tasks.

Check the menu

Pressing the Esc key will take you to the game's tablet menu. Here you can distribute Skill Points, buy new vehicles and even find more missions later on in the game. What's more, you'll find the map of the city helpful time and again.

Buy buildings

If you need a constant flow of income to earn money faster, you should keep an eye out for properties for sale in the menu. Some buildings will provide a regular income, while others, such as gas stations, reduce everyday costs.

Performance

If the game is running too slowly, you can change the graphics setting in Options to achieve a higher frame rate. Reducing the resolution and/or turning off visual effects allow the game to run smoothly even on weaker systems.

Support

Do you need help with a job or are looking for news about CITYCONOMY? Visit our STEAM® forum:

<http://steamcommunity.com/app/304580/discussions/>

Before contacting our support team, first check and, if available, update the drivers on your PC. Many graphics and sound problems can be resolved by simply updating the drivers.

If you have any questions about this product which have not been covered in the manual, you can contact the astragon Entertainment support team as follows:

E-mail support: helpdesk@astragon.de

You can find our current hotline times on our website www.astragon-entertainment.de.
