【Table of Contents】

1. How to Install the Game
==
This product uses the Steam service provided by Valve.
After installing the Steam client and registering the account, you will be able to play "Attack on Titan 2."
For information on how to use Steam, please refer to the following page.
http://store.steampowered.com/

2. Game Installation Fails
==
If you have any software such as antivirus software running, please disable it and try the installation process again.

3. Game Won't Start (Updating Video Card Driver)
==
Please update your video card driver.
For driver updates, please contact the manufacturer.
AMD http://support.amd.com/en-us/download
NVIDIA http://www.nvidia.com/Download/index.aspx?lang=USA
Note: The URL above is subject to change. Please contact the manufacturer for the latest information.

4. Game Won't Start (No Error Message)
==
Please make sure your computer's sound card is being recognized properly.
You might be able to have the sound card recognized by inserting earphones directly into the audio output terminal of your computer.
For details on sound card settings, please check with the sound card manufacturer.

5. Game Is Slow
==
You may be able to troubleshoot by adjusting game settings as follows.

   1. Start the game.
   2. Select "System" and then "Options" from the main menu and make the following settings.
     ・On the "Graphics 1" tab, change "Resolution" to the lowest setting (1280× 720).
     ・On the "Graphics 1" tab, change the "Depth of Field" setting for grass to "OFF."
     ・On the "Graphics 2" tab, change the "Quality Settings" to "LOW."

6. Default Settings
===

The game is set to keyboard operation by default.
Assignment is as follows.
You can change assignment settings by selecting "System" > "Options" > "Controls" from the menu screen.

7. Controller Settings
===

You may find that you can play more comfortably with a gamepad.
To use a gamepad, connect it to your computer and install the driver.
For gamepad details, please contact the manufacturer of the gamepad.

Note: This game is compatible with XInput standard gamepads.
No guarantee is made that this game will operate properly with all gamepads.

8. After Rebooting, Error Occurs with Gamepad Operation
===

If this happens, please try the following two steps.
　　・In the Steam settings, under "Controller" > "General Controller Setting," uncheck all check boxes except for "Guide Button Focuses Steam."
　　・Confirm that "Running" is no longer displayed for this Steam library application name, and then start the game.
