Passion, humor, mystery, horror and drama!  
A videogame for Windows, Mac e Linux

July 19th 2018

### Installation

The Express Killer is an adventure game for Windows, Mac and Linux. It should run fine all the way back to Windows XP. If you are reading this, you probably got the game on Steam or the Humble Store so there isn't much to say in regards on how to install the thing. Unless off course you downloaded it from some torrent. If that is the case then at least please crack it correctly and have fun playing it. The last thing we need is a broken game because someone did a bad job at creating a crack.

### Story

Someone has been killing passengers on the express train from Lisbon to Porto, every single day since Tuesday! Someone needs to stop the killer! Once again Garcia is not up to the task (was he ever?) and reluctantly calls upon his old friend and his strange flying sidekick: the mythical Detective Case and the unmistakable Clown Bot. Together, they will board on the express train, bother everyone by asking annoying questions, pick up everyone's belongings and call them clues, drink and eat for free at the bar (because they are working after all!) and if all goes well, find and stop the express killer. Oh, and they have to babysit Garcia's kid because his mom is in Porto and Garcia is busy and since they are taking the train to Porto they might as well take him with them. What could go wrong, right? Time for you to board on a brand new adventure filled with humor, cases (this time many cases!), mysteries, and even more characters now than ever before! Will you be able to gather clues, solve the puzzles, succeed the trials, and find the culprit before reaching the final station?!

### Gameplay

The Express Killer is the sequel to Murder in the Hotel Lisbon. It is a videogame inspired by the classic point and click adventures from the 80's and 90's. It works through a simple interface of pointing and clicking. Everything that is essential for game progression can be clicked like characters, objects or doors. All the items collected are kept to be used later and are accessible at any time. You can save up to 3 different games and the game can be saved (almost) at any time.

## Credits

---

### NERD MONKEYS

Filipe Duarte Pina - Director, Writer, Artist, etc. your typical egocentric guy

Diogo Vasconcelos - Producer, Philanthropist and Financial Juggler

José Castanheira - Programmer, Artist and... han?

José Rua - Sidelines Programmer

Uriel Cordas - Fabulastic Scenery designer and circus animator

Philippe Coulombier - Commercialisation Française

### AWESOME CHARACTER DESIGN

Nuno Saraiva

### MUSIC - Orchestral

Rafael Pina - Compôs novamente a música catita

João Mascarenhas - One man orchestra

### MUSIC - Justin Case

Ricardo Gordo e Samuel Lupi

Letra de Filipe Duarte Pina

### MUSIC - Cold as Ice

Letra e música de Ricardo Gordo

### COFFEE BOY

Frank Pereira

### TESTS AND Q.A.

André Silva

Carina Sampaio

Carlos Borges

Diogo Queirós

Duarte Ferreira

Francisco Moreira

Francisco Santos

Iuri Martinho

João Sapiro Josué

João Genebra

Philippe Coulombier

Rafael Pina

Uriel Cordas

Virgílio Silva

Wilson Almeida

Alunos do IST

Alunos da ETIC

Alunos da Universidade Europeia

### SPECIAL THANKS (the guys that worked for free)

Catarina Santos

Ewa Machnik

Filipe Barbas

Ivan Barroso

João Cabral

João Caeiro (Chuck)

João Sapiro Josué - criador da unha do pé

Lilianna Pina

Luís Bacharel  
Manuel Menezes de Sequeira  
Nélio Códices  
Nuno Serrador  
Nuno Zhu  
Radhika Gentilal  
Samuel Lupi

Some babies were born during the production of this game, but not inside the studio. That would be weird and very unhealthy.

MADE IN  
Game Maker Studio 1.4 and 2.0

PRODUCED IN  
2018 / Lisbon, Portugal

Technical Support:  
=====

The Express Killer is a game for Windows, Mac and Linux.  
It should run fine in older computers but if by any chance you run into any problems send us an email and we will be happy to see if we can do something about it.

Known current problems:

- Game Maker Studio has some issues with on-board chipsets by intel like those used on some laptops. Until Yoyo Games fixes this we can't do a thing about it.
- The game runs on the latest version of Windows 10 just fine but, with some Nvidia graphics, it might get sloppy and slow. Please contact Nvidia and tell them that we sent you, they will know what to do.
- Linux is only supported in it's 32 bit version.
- When installing on Mac OS, if the following notice appears: "Is damaged... should move it to trash" this is actually a Gate Keeper problem.

MINIMUM REQUIREMENTS TO RUN THIS THING:  
PC running Windows XP or Ubuntu 12.0.4 and a dedicated graphics card with 128mb of RAM.  
Macintosh running OS X 10.6 Snow Leopard and a dedicated graphics card with 128mb of RAM.
